

Day 6

Today was our last day of our project. After we woke up this morning, we went to the school in Stray Sacz for the last time. At first listened to some final presentations about learning apps like Kahoot. These presentations explained how to use them and why they help with learning. After that we had a little farewell snack with some delicious self-made cakes from the polish students.

The next point of our day plan was a performance of a group of actors who showed us some fights and dances of medieval times. Partly it looked really brutal and dangerous what they made. Some of us where part of this program spontaneously as knights and dancers. All in all it was pretty interesting and funny. Afterwards we sat together and had pizza. Last but not least we met Dariusz Popiela online. He is a kayak sportsman and lives in Nowy Sacz. He was a really talkative person and described his life and career to us. Even his answers to the questions where really detailed.

Then the time was over and we had to say goodbye. Unfortunately the time went over to fast. The Slovakiens as well the Spanish left today. We are leaving tomorrow , it will be a long journey.
